

case study

BT Showcase & Innovation Centre, Stockport

Brief

The Showcase and Innovation Centre are both key areas of high client and corporate presentations for our client. This shared facility needed to equally benefit all site operators and clients through enhancing the visitors' appreciation of the overall site, available facilities & demonstration areas.

- each area had to be distinctive, with its functions also relative to its purpose
- needed flexibility to create an innovative solution that allowed both zones to co-exist operatively within the space on the Ground Floor
- solution should embrace the future requirements of BT Showcase and Innovation Centre.

Size

350sqm for the showcase and 130sqm for the auditorium

Services

The solution for the project included:

- Interior Architecture
- Strategic space planning
- Lighting consultation
- Feature lighting
- State of the art audio visual facilities
- Bespoke Joinery
- Technology audit
- Project Management

Duration

on site for 12 weeks

Cost

£1.3 million
